

EXPERIENCE

Agree.com

Head of Product

Bend, OR

(Feb 2015–Present)

I'm in charge of branding & design for both product & marketing. This includes all of the UX/UI for the product as well as the design for the marketing website, emails, and ads. I lead the team in collecting & analyzing feedback from customers, strategizing and creating a product road map, and executing the tasks we created within the time frame we set. I also act as a design consultant for our partner products, building both responsive web apps and mobile apps.

eBay Inc.

Senior Designer | Brand Experience

San Jose, CA

(Sept 2012–Feb 2015)

A large part of my job was to pre-visualize (PreVIZ) ideas just as a project began. We worked across the organization to define problems, explore opportunities and visualize the future as we pushed design culture forward at eBay. We used design, video, motion graphics, and photography to help solve problems, build a better customer experience, and tell great stories.

Aleph Surf

Volunteer Videographer/Designer

Jeffreys Bay, South Africa
